I pay for and receive quality radio free of commercial indoctrination and commercial spam through XM at this time. Commercial free radio and TV is good for the people of the US that want to think for themselves. People need to be free of the spam of advertizers. We need to get information from satellite radio anywhere anytime when we chose and what we chose.

I do not get instant weather and never do from public or commercial broadcast stations when I need it. I look forward to receiving uninterrupted instant news and weather through the paid service of satellite radio in and around Charlotte, North Carolina.

I urge the FCC to reject the NAB's petition 04-160

Respectfully and sincerely.
